

RAJVI DESAI

Oracle EBS Developer · Business Analyst · GenAI & Agentic AI Enthusiast

+91 99254 66635 · desairajvi29@gmail.com · [LinkedIn](#) · [Portfolio](#) · [GitHub](#) · Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Oracle EBS Developer and Business Analyst with hands-on production experience in Procure-to-Pay (P2P) and Order-to-Cash (O2C) cycles. Skilled in SQL/PL/SQL, Python, Power BI, and Agentic AI, with a proven track record of automating enterprise workflows and delivering measurable business impact. Currently advancing expertise in Generative AI and Agentic AI at BITSoM through hands-on multi-agent system development.

CORE SKILLS

Languages: SQL, PL/SQL, Python, X++, DAX, Power Query

AI & Automation: Generative AI, Agentic AI, ETL Pipeline Design, Playwright, Postman

ERP & Databases: Oracle EBS R12, MS Dynamics AX 2012, MS SQL Server, Oracle SQL Developer

Analytics & BI: Power BI, Tableau, Regression Modelling, Attribution Modelling, MS Excel

Oracle Stack: Oracle Forms & Reports, XML Publisher, BI Publisher, Workflow Builder

Tools & Platforms: GitHub, VS Code, Screener.in, JSON Payload Validation

PROFESSIONAL EXPERIENCE

Executive – Applications | Oracle & MS Dynamics AX Developer | Atul Infotech

Dec 2022 – Feb 2024

- Spearheaded end-to-end RICEFW delivery in Oracle EBS across P2P and O2C modules — spanning custom reports, interfaces, data conversions, workflow extensions, and Oracle Forms from requirement analysis to go-live.
- Engineered 15+ enterprise-grade reports using Oracle BI Publisher and XML Publisher with custom PL/SQL logic, improving reporting accuracy and reducing turnaround time.
- Configured and extended Oracle Workflows to automate approval processes across Purchasing, Payables, Order Management, and Receivables — cutting procurement cycle time by 35%.
- Architected a PL/SQL-based automated email alert system for approval workflows, accelerating approval turnaround by 40%.
- Optimised complex SQL/PL/SQL queries with analytical functions, boosting report generation performance by 30%.
- Developed a custom On-Hand Inventory Form in MS Dynamics AX 2012, enabling near real-time stock visibility for warehouse operations.

KEY PROJECTS

Marketing ROI & Budget Optimisation | Python · Power BI · Regression Modelling

Feb 2026 – Mar 2026

[BITSoM Capstone](#) | [View Portfolio →](#)

- Projected \$1.4M (+12%) revenue uplift by reallocating 18.4% of the marketing budget using Last-Touch Attribution modelling, achieving a 4.99 ROAS.
- Built a Log-Log Linear Regression model estimating +1.12% revenue per 1% incremental spend increase, grounded in multi-source historical data.
- Automated multi-source data ingestion and transformation via Python ETL workflows; delivered an interactive Power BI dashboard with channel performance matrices and scenario-based budget recommendations.

Stock Picker Agentic Workflow System | Python · Agentic AI · Playwright · CLI

Mar 2026 – Jun 2026

[Self-Initiated](#) | [View GitHub →](#)

- Architected a modular multi-agent system with specialised agents for daily stock scanning, weekly watchlist review, fundamental screening, and structured decision logging.
- Automated ingestion of screening data from Screener.in via CDP-attached Playwright, normalising CSV exports into versioned watchlist snapshots for quality-controlled analysis.
- Implemented timestamped, evidence-based decision logging to create a traceable audit trail for all buy/sell decisions, demonstrating production-grade Agentic AI architecture.
