

RAJVI DESAI

Oracle EBS Developer · Business Analyst · GenAI Enthusiast

+91 9925466635 | desairajvi29@gmail.com | linkedin.com/in/rajvi-desai-1356a81b1 | Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Oracle Developer and Business Analyst with hands-on experience at the intersection of business complexity and Oracle technology — turning requirements into production-ready solutions. Specialising in Oracle EBS across the full RICEFW landscape: custom reports, interfaces, data conversions, workflow extensions, and Oracle Forms. Proven track record in performance tuning, ERP implementation cycles, and data analytics using Power BI and Python. Committed to engineering scalable solutions that address business needs without creating technical debt.

CORE SKILLS

Languages: SQL, PL/SQL, Python, X++, DAX, Power Query	Databases: Oracle EBS R12, MS SQL Server, Microsoft Dynamics AX
Oracle Stack: Oracle EBS R12, Oracle Forms & Reports, XML Publisher, Workflow Builder	AI & Data: Generative AI, Agentic AI, ETL Pipeline Design, Playwright, CLI Automation
Analytics & BI: Power BI, Tableau, MS Excel, Regression & Attribution Modelling	Business Analysis: Requirements Gathering, Stakeholder Analysis, Process Optimisation

PROFESSIONAL EXPERIENCE

Atul Infotech <i>Executive – Applications (Oracle & MS Dynamics AX Developer)</i>	<i>Dec 2022 – Feb 2024</i>
- Delivered across the full RICEFW landscape within Oracle EBS — covering custom reports, interfaces, data conversions, workflow extensions, and Oracle Forms, from requirement analysis through to go-live. - Assisted in development and customisation of Oracle EBS components for P2P and O2C modules. - Developed custom reports using XML Publisher and PL/SQL and built 15+ enterprise-grade reports using Oracle BI Publisher. - Configured and modified Oracle Workflows to automate processes in Purchasing, Payables, Order Management, and Receivables; reduced procurement cycle time by 35%. - Supported Oracle Forms Builder development and personalisation; engineered custom Forms with PL/SQL triggers to enhance data integrity across financial and procurement modules. - Optimised complex SQL/PL/SQL queries using analytical functions — boosted report generation performance by 30%. - Architected a PL/SQL-based automated email alert system, improving approval turnaround by 40%. - Designed a custom On-Hand Inventory Form in AX 2012 for near real-time stock visibility.	

KEY PROJECTS

Marketing ROI & Budget Optimisation <i>BITSoM Capstone Project</i>	<i>2025 – 2026</i>
- Projected \$1.4M (+12%) revenue uplift by reallocating 18.4% marketing budget using Last-Touch Attribution modelling (4.99 ROAS). - Built a Log-Log Linear Regression model estimating +1.12% revenue per 1% spend increase; automated multi-source data pipelines via Python ETL workflows. - Delivered an interactive Power BI dashboard with executive summaries and channel performance matrices.	
Stock Picker Agentic Workflow System <i>Self-Initiated Python · Agentic AI · Playwright · CLI Automation</i>	<i>Ongoing</i>
- Designed a modular multi-agent system with specialised agents for daily stock scanning, weekly watchlist review, fundamental screening, and structured decision logging. - Engineered reusable skill modules (position-logging, entry-setup, scanner-refresh) with clear orchestration protocols separating agent-level and script-level execution. - Automated ingestion of screening data from Screener.in via CDP-attached Playwright, normalising CSV exports into versioned watchlist snapshots for quality-controlled analysis. - Built timestamped, evidence-based decision logging workflow creating a traceable audit trail for all buy/sell decisions — demonstrating production-grade Agentic AI architecture.	

EDUCATION

Minor in Business Analysis with GenAI & Agentic AI	<i>BITS School of Management Jul 2025 – Apr 2026</i>
Bachelor of Engineering – Information Technology	<i>Gujarat Technological University 2018 – 2022</i>
